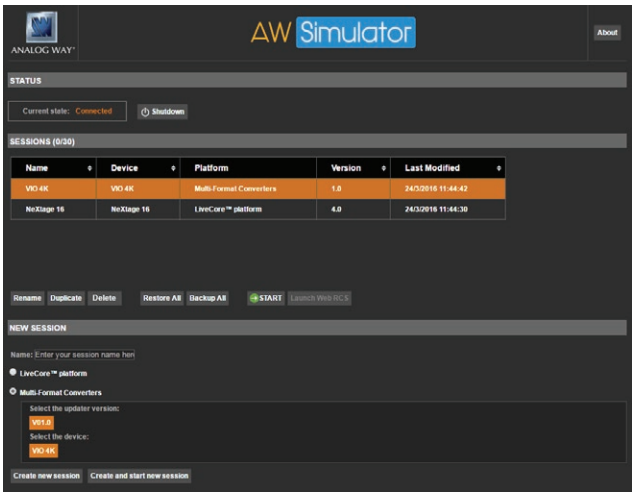
AW Simulator

NEW

Simulate **Analog Way**'s multi-format converter **VIO 4K** and **LiveCore™** premium switchers on your PC or Mac

AW Simulator

Windows Mac



AW Simulator at a glance

- Simulate multi-format converter **VIO 4K** and **LiveCore™** premium AV switchers (no 'real' device needed)
- Integrated **Web RCS** for self-training or for preparing a configuration (**offline mode**)*
- Save your work at the end of simulation session and seamlessly resume it the next time
- Optionally use the **AW Gateway** software to interface the Simulator to external controllers like **Vertige™**, Shot Box, Crestron®, AMX®, etc

**Coming soon: Import / Export configuration from/to a 'real' device*

AW Simulator enables you to simulate **VIO 4K** and **LiveCore™ series** devices on your PC or Mac. You can launch the integrated **Web RCS** and interact with the virtual device and prepare a show as you would do with a 'real' device.

Steps:

- Install **Oracle VirtualBox** then install **AW Simulator**.
- Launch the **AW Simulator** virtual machine and wait for the console window to appear
- Launch your web browser then enter the provided IP address to display the web user interface of the virtual machine
- Select the type of device as well as the corresponding firmware then start a new simulation session.
- Click the **Launch Web RCS** button to open the integrated **Web RCS**

Free tools also available on www.analogway.com

- AW Gateway: Take control of any Analog Way switcher with multiple network interfaces simultaneously
- AW EDID Editor: Solution to create and edit EDID files for an optimal compatibility between your sources and displays
- AW Screen Frame Cutter: Tool to split any wide-screen image into multiple still backgrounds for your multi-projector Soft Edge Blending
