LiveCore™ Certification Program

ANALOG WAY®
Pioneer in Analog, Leader in Digital

○ Analog Way: A training offer to assist you

For more than 25 years, Analog Way has been a leading designer and manufacturer of innovative presentation switchers and image converters. As a video processing expert, Analog Way is committed to support its customers through training tailored to individual needs.

Whether you are an integrator, consultant or freelance technician, Analog Way offers training that will enable you to take full advantage of our AV processors in various environments.

○ LiveCore™ Certification Program

Designed for highly demanding installations or events, the **LiveCore™** range consists of 4 high-end mixers: **NeXtage 08**, **NeXtage 16**, **SmartMatrix Ultra**, **Ascender 16**, **Ascender 32** and **Ascender 48**.

Those products offer a ruggedized design, versatile connectivity and state-of-the-art processing. The setup and control of the **LiveCore™** processors is available through the **Web RCS**, a web-based remote control software, or through the **Vertige™** controller (separate Certification Program available for **Vertige™**).

To ensure a more creative and richer user experience, Analog Way has developed a training program dedicated to the **LiveCore™** range. Whether you need a first approach to the **LiveCore™** environment, or a deep understanding of all features to become a real expert, Analog Way offers trainings that will enable you to achieve your goals.

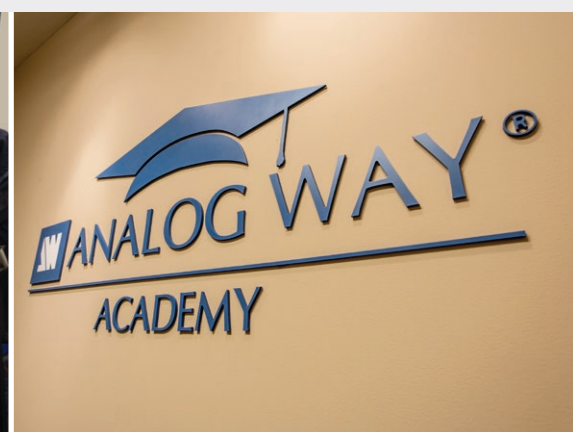

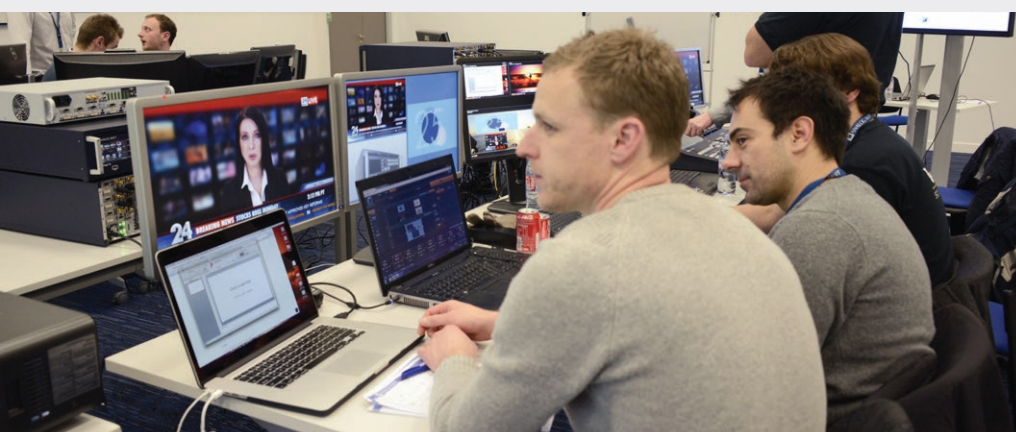

LiveCore™
CERTIFICATION PROGRAM

3 training levels

Analog Way has designed **3 training levels** to best meet everyone's needs. The two most complete trainings award an official certification.

By becoming a **LiveCore™ Certified Operator**, you will get new skills and consequently be able to deploy more creativity when using our systems.

You will also join the **LiveCore™ Certified Operators** directory; your expertise officially recognized by professionals in the Pro AV market.

Objectives:

- According to your expectations, to get more familiar with the LiveCore™ products, or become a real expert
- Unleash your creativity
- Become a certified operator

Target audience:

Training exclusively intended for video professionals:

- Technicians / Freelance operators
- Integration companies
- Event contractors
- Consultant offices
- End users

Prerequisites:

- Basic knowledge of video signals including HDCP, EDID and various video formats
- Be familiar with image processing

Basic Operator: 1 day

This training gives an understanding to the **LiveCore™** environment and the control through the **Web RCS** software. Other themes are reviewed during the training: Input/Output specifications, **LiveCore™** processors setup, etc.

At the end of the session, participants will have sufficient knowledge to use the **LiveCore™** range for simple applications.

Advanced Operator: 2 days – Certified training

During these two days the overall functioning of **LiveCore™** switchers is presented. The class provides in-depth review of innovative features: advanced layer management, output rotation, Cut and Fill, etc. Participants are also trained in Soft Edge Blending techniques.

At the end of the session after passing theoretical and practical tests, participants will obtain their official **LiveCore™** certification, demonstrating a good command of the products.

Expert Operator: 3 days – Certified training

This training is based on the “**Advanced Operator**” program with one more day dedicated to the powerful **LiveCore™** features such as the perspective layers.

After passing theoretical and practical tests, participants are then officially certified.

○ Analog Way's Training Centers:

A room has been especially designed to welcome trainings at Analog Way's headquarters.

The **LiveCore™ Certification Program** is also delivered by our American and Asian subsidiaries. If needed, trainings can be directly provided on your site.

○ Network of Certified Trainers:

In order to reinforce its training offer and to deliver local support, Analog Way leans on a network of certified partners. The training program complies with quality standards defined by Analog Way. Trainings are provided by **LiveCore™** and **Vertige™** systems experts, themselves trained and certified by Analog Way's product experts.

○ Contact:

To stay tuned for upcoming training dates, please refer to Analog Way's website, and connect with us on social networks.

Our teams remain at your disposal to evaluate your demand on specific trainings.
