# Adobe Flash Player End-of-Life Impact On Some Analog Way products

***Analog Way's LiveCore™ live presentation switchers and VIO 4K multiformat converters will be affected by Adobe's decision to move its Flash technology to end-of-life status*.***

If you are using these products, Analog Way has created a 'custom browser' to provide specific access to Analog Way devices based on Flash technology, and only these.

This browser, named AW Browser, is available both for Windows and Mac OS and can be downloaded directly on the Analog Way web site.

Once installed on your computer, you can use the AW Browser application to connect your VIO 4K or LiveCore™ processor as you previously did with popular web browsers.

For more information about the products affected by the end of Flash support and the actions to be taken, please read our Questions & Answers document.

You can directly download the AW Browser via this page: AW Browser

*All the other Analog Way products don't use the Flash technology at all and are therefore not affected by this change.

**About Analog Way**

Analog Way is a world-leading designer and manufacturer of innovative equipment dedicated to the professional audiovisual industry. The company's portfolio includes a wide range of award-winning multi-screen presentation systems, media servers, event controllers and multi-format converters, designed to deliver uncompromising video presentation experiences to high-end staging and premium system integration. For 30 years, Analog Way has provided advanced processing technologies, which accommodate a large range of applications, from massive video wall installations to large corporate events worldwide. www.analogway.com
