Analog Way Announces SDVoE™ Support And New Features For LivePremier™ Presentation Systems

Analog Way announces the immediate availability of new SDVoE™ compatible input and output cards for Aquilon and an array of new features and improvements with the 2.3 software release, including high frame rates up to 144fps, support of the HTTPS protocol for secure connections and joystick support for the RC400T event controller.

The LivePremier™ video processors ecosystem expands with the introduction of new field swappable input and output boards both compatible with the SDVoE™ technology. Each of these cards is equipped with four 10GbE RJ45 copper connectors capable of transmitting or receiving four independent video streams over IP with formats up to 4K60. The cards support up to 8 embedded audio channels per input and output and feature advanced HDCP 1.4 and 2.2 handshake. They are also interoperable with any SDVoE™ extender and control system, allowing LivePremier™ video processors to easily integrate into an SDVoE™ environment and workflow.

The new 2.3 release brings support for high frame rates (HFR) allowing full video processing workflows up to 144fps. Also in the new version is support of the HTTPS protocol in the Web RCS user interface, providing secured connections to the LivePremier™ systems and allowing SSL/TLS certificates and keys to be uploaded and applied to the system.

Additionally, the LivePremier™ systems can now be operated by the RC400T three-axis joystick for easy and fast layer positioning, sizing and cropping. The RC400T is Analog Way's powerful event controller designed to greatly increase the level of operational efficiency and give instant access to crucial functionalities such as screens, layers, sources and memories.

The LivePremier™ modular and scalable 4K/8K multi-screen presentation systems and videowall processors deliver uncompromising presentation experiences to high-end staging and premium system integration. The range includes five high-performance, pre-configured products (Aquilon RS alpha, RS1, RS2, RS3 and RS4) and two fully customizable models (Aquilon C and C+) that can be tailored to match the requirements of any project or event.

To discover all the benefits of version 2.3 and download it, visit the LivePremier™ Presentation Systems page.

* SDVoE™ is a trademark of the SDVoE Alliance

About Analog Way

Analog Way is a world-leading designer and manufacturer of innovative equipment dedicated to the professional audiovisual industry. The company's portfolio includes a wide range of award-winning multi-screen presentation systems, media servers, event controllers and multi-format converters, designed to deliver uncompromising video presentation experiences to high-end staging and premium system integration. For 30 years, Analog Way has provided advanced processing technologies, which accommodate a large range of applications, from massive video wall installations to large corporate events worldwide. www.analogway.com
