Analog Way LivePremier™ 4K/8K Live Presentation System at InfoComm 2019

Analog Way's game-changing 4K/8K live presentation system will be presented at InfoComm 2019, June 12-14 in Orlando, FL. Dedicated to high-end staging and premium system integration, the new platform will be showcased at Analog Way's booth #1316 via professional presentation sessions and demos, along with the latest release of Picturall™ media servers.

LivePremier™ is a full range of modular and scalable 4K/8K multi-screen presentation systems and videowall processors delivering uncompromising presentation experiences to high-end staging and premium system integration.

The LivePremier™ Aquilon systems combine industrial-grade reliability, real-time 10/12-bit 4:4:4 video processing power compliant with HDR, and pure 4K60p on each input and output with ultra-low latency.

In its largest chassis configuration, LivePremier™ Aquilon offers up to twenty-four 4K60 inputs and twenty 4K60 outputs configurable as single screens, edge-blended widescreens or scaled auxiliary outputs; two dedicated 4K Multiviewer outputs; up to twenty-four 4K or forty-eight HD freely assignable layers, as well as powerful features for any advanced display configurations.

For ease of setup and to ensure flawless control of multi-screen presentations, the series features a totally new, cutting-edge HTML5-based user interface: the Web RCS, compatible with any device or platform, including iOS and Android devices. It simplifies configuration and operation through unique features such as live program/preview workspaces with high-resolution dynamic thumbnails of connected sources, multi-operator collaboration with password protection and user privileges, walkthrough guides, keyword search, and multi-language support.

Field-replaceable I/O connector modules allow connectivity to a variety of formats, including HDMI2.0, DP1.2, 12G-SDI and future potential formats such as single-cable 8K and IPTV transports.

With the native Dante™ audio routing capability, up to 64 channels of audio can be embedded or de-embedded over a Dante™ network.

The LivePremier™ series includes four pre-configured products (Aquilon RS1, RS2, RS3 and RS4) and two fully customizable models (Aquilon C and C+) that can be tailored to match the requirements of any project or event.

Analog Way's booth at InfoComm will also put the spotlight on the latest 2.8 software version of its Picturall™ media servers now featuring support for Newtek NDI input sources as well as the highly anticipated support for crossfading within one layer, which will make configuration even easier and faster.

About Analog Way

Analog Way is a world-leading designer and manufacturer of innovative equipment dedicated to the professional audiovisual industry. For 30 years, Analog Way has developed and manufactured a wide range of high-end solutions and reliable equipment for professional AV applications, including videowall processors, mixers and seamless presentation switchers, media servers, event controllers and multi-format converters. In February 2019, Analog Way launched LivePremier™, a new series of ultra-powerful 4K/8K live presentation systems for high-end staging and premium system integration. Analog Way solutions help deliver uncompromising video presentation experiences to customers in the Rental & Staging, Corporate, Broadcast, Institutional, Higher Education and House of Worship markets worldwide. www.analogway.com.
