

Embedded Soft Edge Presentation using one Di-VentiX II

2 PIP Layers, 1 Background Frame and 1 Luma/Chroma Key/DSK Title

* The video output option displays the same information as the Output Preview. The layers are identified by a letter:
 - "A to D" > Live Layers
 - "L" > Logo Layer
 - "F" > Frame Layer

With the video output option the Program (Main) Picture is recomposed even if the picture is in «Embedded Soft Edge Mode». This option provides a real easy solution for previewing any source during a show.

The numbers associated with the letter of the layer indicate the input source.

Example : A05 ▶ Layer A, Input #5
 B ▶ Layer B without input source
