

Simulate any Midra™ 4K series seamless presentation switcher on your PC or Mac

## Midra™ 4K Simulator

### Create your configuration offline

**Midra™ 4K Simulator** allows you to simulate any **Midra™ 4K** series system on your PC or your Mac. You can launch the integrated Web-based graphic user interface (Web RCS), interact with the virtual device to design and prepare a show on the road as you would do with a real device. You can then export the show to a USB drive and import it straight into your **Midra 4K** seamless presentation switcher.

### Midra™ 4K Simulator at a glance

- ▶ Simulate any **Midra™ 4K** series seamless presentation switcher (no 'real' device needed): QuickVu 4K, QuickMatrix 4K, Pulse 4K or Eikos 4K
- ▶ Easily select and configure the device you want to simulate using the configurator included
- ▶ Use the integrated **Web RCS** for self-training or to start working on a customer configuration offline
- ▶ Save your work at the end of simulation session and seamlessly resume it the next time
- ▶ Export the show you have prepared with **Midra™ 4K Simulator** and import it straight into your **Midra™ 4K** seamless presentation switcher
- ▶ Test the REST API, the Crestron driver, the controllers as well as 3rd party controllers

### Other tools also available on [www.analogway.com](http://www.analogway.com)

- ▶ **AW VideoCompositor for Midra™ 4K**: Design intuitive drag and drop Crestron® user interfaces to control your live events with the Midra™ 4K series seamless presentation switchers (available Q1 2021)
- ▶ **AW EDID Editor**: Solution to create and edit EDID files for an optimal compatibility between your sources and displays
- ▶ **AW Screen Frame Cutter**: Tool to split any wide-screen image into multiple still backgrounds for your multi-projector Soft Edge Blending or for your Custom Canvas screen setup

### Install steps

- Download **Midra™ 4K Simulator** from the Analog Way website and install it on your computer
- Launch the **Midra™ 4k Simulator** then click **Create new session** to create a new simulation session
- Rename the session you have just created so you can easily find it next time and resume it
- Select and configure the type of **Midra™ 4K** device you want to simulate
- Select the corresponding firmware you want to use
- Click **Save** then click **Start Session** to start the simulation session
- Click the **Open WebRCS** button to open the integrated **Web RCS**

**Midra™ 4K Simulator is available on [www.analogway.com](http://www.analogway.com)**
