

## Analog Way's Aquilon Debuts in Thailand

*The conference and gala dinner for PTT Petroleum AGM, Thailand's premier multinational energy company, became the first event in the country to use Analog Way's new Aquilon RS2 to drive a massive array of LED video displays.*

The project, produced by KS Plus Light & Sound System Co.,Ltd., a leading AV company based in Bangkok & Phuket Thailand, was held in August. The Event was designed with three portrait-mode LED video displays that partially arched over the stage to showcase dynamic visuals for speaker support and entertainment. The company chose Aquilon RS2, Analog Way's pre-configured 4K/8K multi-screen presentation system and videowall processor, to power the 4K content.

"The LED screens were very challenging for us because they were not easy to set up," says KS Plus Light & Sound System Co., Ltd, Managing Director, Mr. Sirasak Pichayapipat (Kevin). "We had a total of 117 square meters of LED P4 with a large truss structure and 30 motor hoists."

He reports that our company "was confident that Aquilon RS2 could handle such a large-scale event with last-minute requests and adjustments. We're so grateful that Aquilon arrived in time for the show!"

Mr. Kevin's team paired Aquilon with an Analog Way Pulse<sup>2</sup> - 3G high-resolution mixer and seamless presentation switcher for the project.

"With Aquilon RS2 we used three outputs for the main PowerPoint presentation: one went to the four delay screens, one to the live camera feed and one to the panel screens," he explains.

"We had two inputs for two MacPros, one for a MacBook Pro, one for the Pulse<sup>2</sup> - 3G and one for the OB system," he adds. "Aquilon's strength is having more 4K outputs and more layers while being practical and easy to work with. It really made our lives easier during this event!"

Mr. Kevin says, "the results of Aquilon were excellent" and everyone was pleased with its performance. "The clients were so impressed that we could easily handle any additional requests they made on site."

### About Analog Way

Analog Way is a world-leading designer and manufacturer of innovative equipment dedicated to the professional audiovisual industry. For 30 years, Analog Way has developed and manufactured a wide range of high-end solutions and reliable equipment for professional AV applications, including videowall processors, mixers and seamless presentation switchers, media servers, event controllers and multi-format converters. In February 2019, Analog Way launched LivePremier™, a new series of ultra-powerful 4K/8K live presentation systems for high-end staging and premium system integration. Analog Way solutions help deliver uncompromising video presentation experiences to customers in the Rental & Staging, Corporate, Broadcast, Institutional, Higher Education and House of Worship markets worldwide.
